1. The production goal for all types of coal from the Ruhr has been between 170 and 180 thousand tons for the last several weeks. Although this goal has never been reached, the report states that Rheinhessen is certain to get its full September allotment, as its requisition is in competent hands. Below are the figures for coal scheduled to reach Rheinhessen for distribution in September, compared with the figures of actual deliveries in August:

	SAAR Coal & Coke	RUHR Coal & Coke	Briquettes	TOTAL
September	6,775	8,925	5,475	21,175 tons
August	7,725	2,006	8,013	17,744 tons

2. In the Rheinhessen industrial area, the report says, about one hundredweight of briquettes has been lately received per month for the heating of houses. (Comment: This is most likely per household.) For other purposes, the total distribution in Rheinhessen has been broken down, in the September schedule attached to this report, into amounts allotted to individual recipients in the areas of Mainz, Worms, Bingen, and Alzey. The totals of various types of coal to be received by these four areas are as follows:

	Coal	Coke	Briquettes	TOTAL
Mainz	6,062	125	1,075	7,262
Worms	7,130	170	3,970	11,270
Bingen	1,698	30	275	2,003
Alzey	450	15	155	620
September totals:	15,360	340	5,475	21,175
August totals:	9,186	545	8,013	17,744
